Re: Alex Figliolia Water & Sewer
420 Carroll Street
Brooklyn, NY 11215

January 23, 2015

To whom it may concern,

Alex Figliolia Water & Sewer completed the excavated and replaced two 6' water lines and one 8" water line under approximately 50 feet of street and 100 feet of sidewalk and replaced the three curb valves to resolve a major leak into the Southbridge Tower's buildings. They backfilled and restored the street and laid temporary asphalt on the sidewalk. They will return in the spring to replace the concrete.

I would recommend Alex Figliolia Water & Sewer and use them again at Southbridge Towers if needed. They worked 24 hours a day in a very professional manner and were able to maintain domestic water service throughout the project. They did not obstruct pedestrian traffic and kept their work site clean.

You can call me at the above number if you need more information.

Sincerely,

Michael Stellman
Director of Maintenance
